

DEISA EBANO Benefits from Sangfor Hyper-Converged Infrastructure

Overview

Deisa Ebano S.p.A. is a leading company in the field of chemical production for shoe cleaner and household insecticides, known throughout the world by the "Calzanetto" brand.

All-In-One Enterprise Private Cloud

Deisa Ebano S.p.A., a global corporation with Headquarters in Bologna Italy, distributes its products in 30 countries worldwide. They chose to partner with Sangfor to construct a new data center after evaluating Sangfors' ability to handle the task of virtualizing their environment. Deisa Ebano selected Sangfor due to their technologically advanced products, the ability to provide secure and fast support and their ability to conveniently manage the installation with a local professional partner 3Cime Technology.

After implementing just one Sangfor HCI cluster composed of two servers, the customer was able to optimize their light web management interface, enabling Italian IT managers to control everything inside the system with ease and agility, with high availability feature to support file sharing, database, administration, management and production software.

Executive Summary

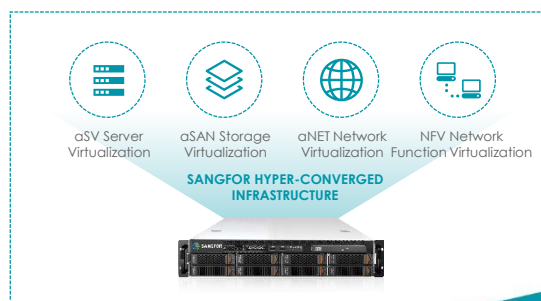

- Customer: Deisa Ebano S.p.A
- Industry: Chemistry
- Location: Italy

Challenges

- Construction of a new data center
- Server virtualization to handle 10 Virtual machines
- High availability to support file sharing, database, etc.

Sangfor Solution

- Sangfor Hyper-converged Infrastructure (HCI)
